

Big Easter Eggs – lots of possibilities to decorate cities for the holidays

From small, only thirty centimeters, to two-meter high giants. Big Easter Eggs impress not only with their scale, but also with their possibilities: with them, Easter will be an opportunity to promote local monuments, a chance to integrate residents, and above all: a moment when beautiful decorations enter the common surroundings!

Urban decorations not only for Christmas

The trend of decorating cities for Christmas is more and more visible in Polish and European cities. Many residents and

tourists, tempted by interesting light illuminations and Christmas installations, go for a walk and take photos. Nothing prevents colorful urban decorations from appearing on streets and in squares also in spring. It is the huge [Easter Eggs](#) on special decorative frames that become the most interesting element of space when winter slowly fades into oblivion. Their fabulous colors effectively add some new glow to the neighborhood, and remind residents of the city: Easter is just around the corner!

Patterned decorative Easter eggs on a roundabout.

Why do Big Easter Eggs have a chance to become a hit among Easter decorations?

The most important advantage of **large Easter Eggs** is enormity of decorative possibilities. [Easter Eggs by TerraEaster](#) come in smaller sizes, from 30 centimeters high to 75 centimeters,

but also for special needs, our company offers really gigantic ones. The largest are up to 150 centimeters high. The choice is truly wide and thanks to this, everyone can find large Easter Eggs perfectly suited to their needs. The smaller ones can be arranged in a pyramid and placed in a [Gianto pot](#) or hung on a lamp. Also, it can become a great solution for an Easter installation in shopping malls or hotels. Over one meter high decorative Eggs will be perfect on a promenade, square or roundabout. They are so large that even without additional decorations cannot be overlooked. However, **the Eggs look even better in compositions.**

Big Easter Eggs for special tasks

Easter Eggs from the TerraEaster collection are made of **fiberglass**, a well-known material used for creating decorations dedicated to urban spaces. Decorations made of it work well [as Christmas decorations](#) exposed to snow and frost,

so they can withstand capricious spring conditions too. Fiberglass is valued for its great strength and, at the same time, lightness, which makes Easter city decorations easy to transport and assemble, as well as disassemble and store. They are extremely easy to care for, and due to the varnished surface, dust does not settle on them, and **the sun does not destroy their vivid colors**. All features of this material makes it a proven solution for years!

Huge Easter Eggs create open art galleries

A tradition of decorating eggs for Easter has been present for ages, visit our post on the natural coloring of them. Home Easter symbols are usually colorful and patterned, so why should it be otherwise in case of urban decorations. Big Easter Eggs can have a uniform, bright color, patterns, landscapes, graphics, basically anything you could imagine. **Thanks to high-quality stickers, the city emblem, wishes for**

residents or even Easter Bunny can appear on the surface of the Easter Egg in a quick and durable way. You can choose a design from a ready template or propose your own, just [contact the Terra Group team](#), competent employees will advise and prepare a visualization of decorations for you.

Big Easter Eggs are a great base for creative residents and local artists to show their skills. The smooth surface of

decorative Easter Eggs is a perfect canvas for the youngest, who will be happy to join the action of decorating the space together. However, there are more ideas: the city symbol of Easter can become a tool for promoting local artists, and squares can transform into open art galleries – just like [in Kórnik in Wielkopolskie voivodship](#).
