

Check this out! Modern bench with a flower pot – for public spaces

What does matter is functionality and setting of elements. Currently, the most popular trend aims at less cars and replacement of some streets and car parks with social gardens and squares.

The striped zebra bench is made of steel covered with powder

coating and in opposition to a wild zebra, it can go in any color – we are done with grayness!

Modern bench with a flower pot – for public spaces

Together with such colorful solutions, our cities present themselves in a completely new light, and also as a friendly place to live. Actually, the stripes became an inspiration while creating one of the most colorful benches. In this round model – [public space bench Zebra](#), the color lines create a hoop, which surrounds the pot with a large plant set inside of it. The bench is an attracting element for children, too. Also, more classical models with standard seats (with or without backrest) will make bus stops and squares more eye-catching.
