Rybnik's residents not only captured the magic but also became integral participants in the charm that defines this beautiful time of the year.

Traditional Christmas tree, sparkling garland, a ball of fresh snow – all accompany us during the holidays in Rybnik. One of the favorite symbols is the openwork decorations, adorning private interiors and gardens, gaining popularity in public spaces as well.

We are pleased to present a photograph shared by the Krawat.Visuals profile in one of the Rybnik groups on Facebook. The color palette of this shot is incredibly beautiful. Noticeable is the thoughtful and emotional way in which this photographic work was created.

Openwork ornaments can enchant not only during the day when their original design is perfectly visible. When night falls, they become a true evening star – just choose the right Christmas lights for the city. Thanks to this simple trick, the Christmas decoration will shine brightly at any time of day, competing with popular holiday illuminations.

We want to express our deep appreciation to Mr. Artur for generously sharing his mesmerizing photograph. Apart from beautifully capturing the festive decorations, it also showcases a Ferris wheel glowing against the night sky, infusing the image with a magical allure reminiscent of a fairy-tale scene.
