

# **Hanging Planter in 6 Ways – Transform Your City with Flowers!**

More and more cities are choosing to invest in urban greenery. Flowers adorn parks and squares, as well as streets, lampposts, and spaces around residential buildings, hotels, and restaurants. **This is a fantastic way to enhance aesthetics and create a friendly, harmonious atmosphere in places frequented by residents and tourists alike.** Hanging planters offer an elegant solution for introducing greenery where traditional pots are not practical – on lampposts, poles, or other elements of urban infrastructure.

With this in mind, we have prepared a new collection of hanging planters that are not only visually stunning but also functional and durable. Among our offerings, you will find six unique models:

- 1. Best – classic elegance at its finest**

**This planter is a versatile solution for mounting on poles of various diameters.** Thanks to its two-part construction, installation is quick and easy.

Its deep design allows for planting vegetation with an extensive root system, while the classic color options—green and black—ensure it blends seamlessly into the surroundings.

## **2. Best Cup – modern elegance**

A slightly different shape, yet the same great functionality – the Best Cup model is perfect for those who appreciate subtle details. Available in classic colors, it complements both modern and more traditional urban arrangements.

If you'd like to learn more about the water drainage system in our planters, check out our catalog: [<CLICK>](#)

### 3. Barist – sleek and lightweight

**This model stands out with its smooth, slender shape, offering an exceptionally elegant look.**

It works beautifully in sets – a duo of Barist planters on a single lamppost creates a harmonious composition, adding a sense of lightness and freshness to the space.

#### **4. Barist Base – with extra water storage**

This is a variation of the Barist model, but with a thicker base that serves as a built-in water reservoir.

Don't be mistaken, though – **all our planters come equipped with an integrated water tank**, ensuring longer plant lifespan and reducing the need for frequent watering.

## 5. Cesar – a touch of ancient charm

This model stands out with both its color and shape. The beige shade and form inspired by Roman architecture make it a perfect choice for those looking to add a distinctive character to their space.

**Such planters are rarely seen in many cities—perhaps it's time to use this unique element to stand out?**

## **6. Woven – natural look, unmatched durability**

The **Woven** model is a planter that closely resembles a handwoven wicker basket.

**Its brown color and textured surface add warmth to any space, while its exceptional durability sets it apart – every one of our planters comes with a 10-year warranty!**

All our planters are designed with durability and functionality in mind. With them, any lamppost can become a carrier of greenery, making public spaces more beautiful and inviting. [Get in touch with us to explore our collection and choose the model that best suits the character of your city!](#)
