

Illuminated Decorations: How to Bring Public Spaces to Life with Outstanding Urban Lighting

Summer is the season when urban spaces come to life – squares, promenades, boulevards, and market areas fill with residents and tourists alike. With long days and warm evenings encouraging people to linger outdoors, it's the perfect time to enrich the city's atmosphere with vibrant summer illuminated decorations.

Summer Illumination – A New Dimension of Urban Atmosphere

Although light displays are typically associated with the winter season, summer deserves its own glow as well. Colorful, lightweight lighting designs in the shapes of flowers, suns,

waves, or butterflies perfectly complement the aesthetics of summer. They breathe new life into urban spaces—making them more welcoming, photogenic, and truly unique.

Summer Illumination – A New Dimension of Urban Atmosphere

While light displays are most often associated with the winter season, summer, too, deserves its moment to shine.

Colorful, lightweight light installations in the shapes of flowers, suns, waves, or butterflies blend perfectly with the aesthetics of summer.

They bring fresh energy to urban spaces—making them more inviting, photogenic, and truly special.

Summer Light That Draws You In

Unlike their winter counterparts, summer illuminations are often more subtle, airy, and colorful. They create atmosphere

without overwhelming the space. Often integrated with urban greenery—flower beds, planters, pergolas—they highlight the seasonal character of the installation even more effectively.

Why Invest in Summer Illuminations?

- They build a sense of place – a city with character is a city with atmosphere.
- They enhance tourist appeal – the perfect backdrop for photos and videos.
- They elevate the quality of public space – encouraging residents to spend more time there.
- They shine all season long – from June evenings to September light festivals.

New Ideas, New Forms – The Summer Illumination Collection

This summer, we're embracing freshness, color, and lightness in form. Our new light decorations combine modern design with energy-efficient LED technology. 3D flowers, glowing garlands, butterflies, and waves of light – all designed to bring urban spaces to life during the vibrant summer months.

These installations are weather-resistant and easy to set up, making them perfect even for shorter seasonal arrangements.

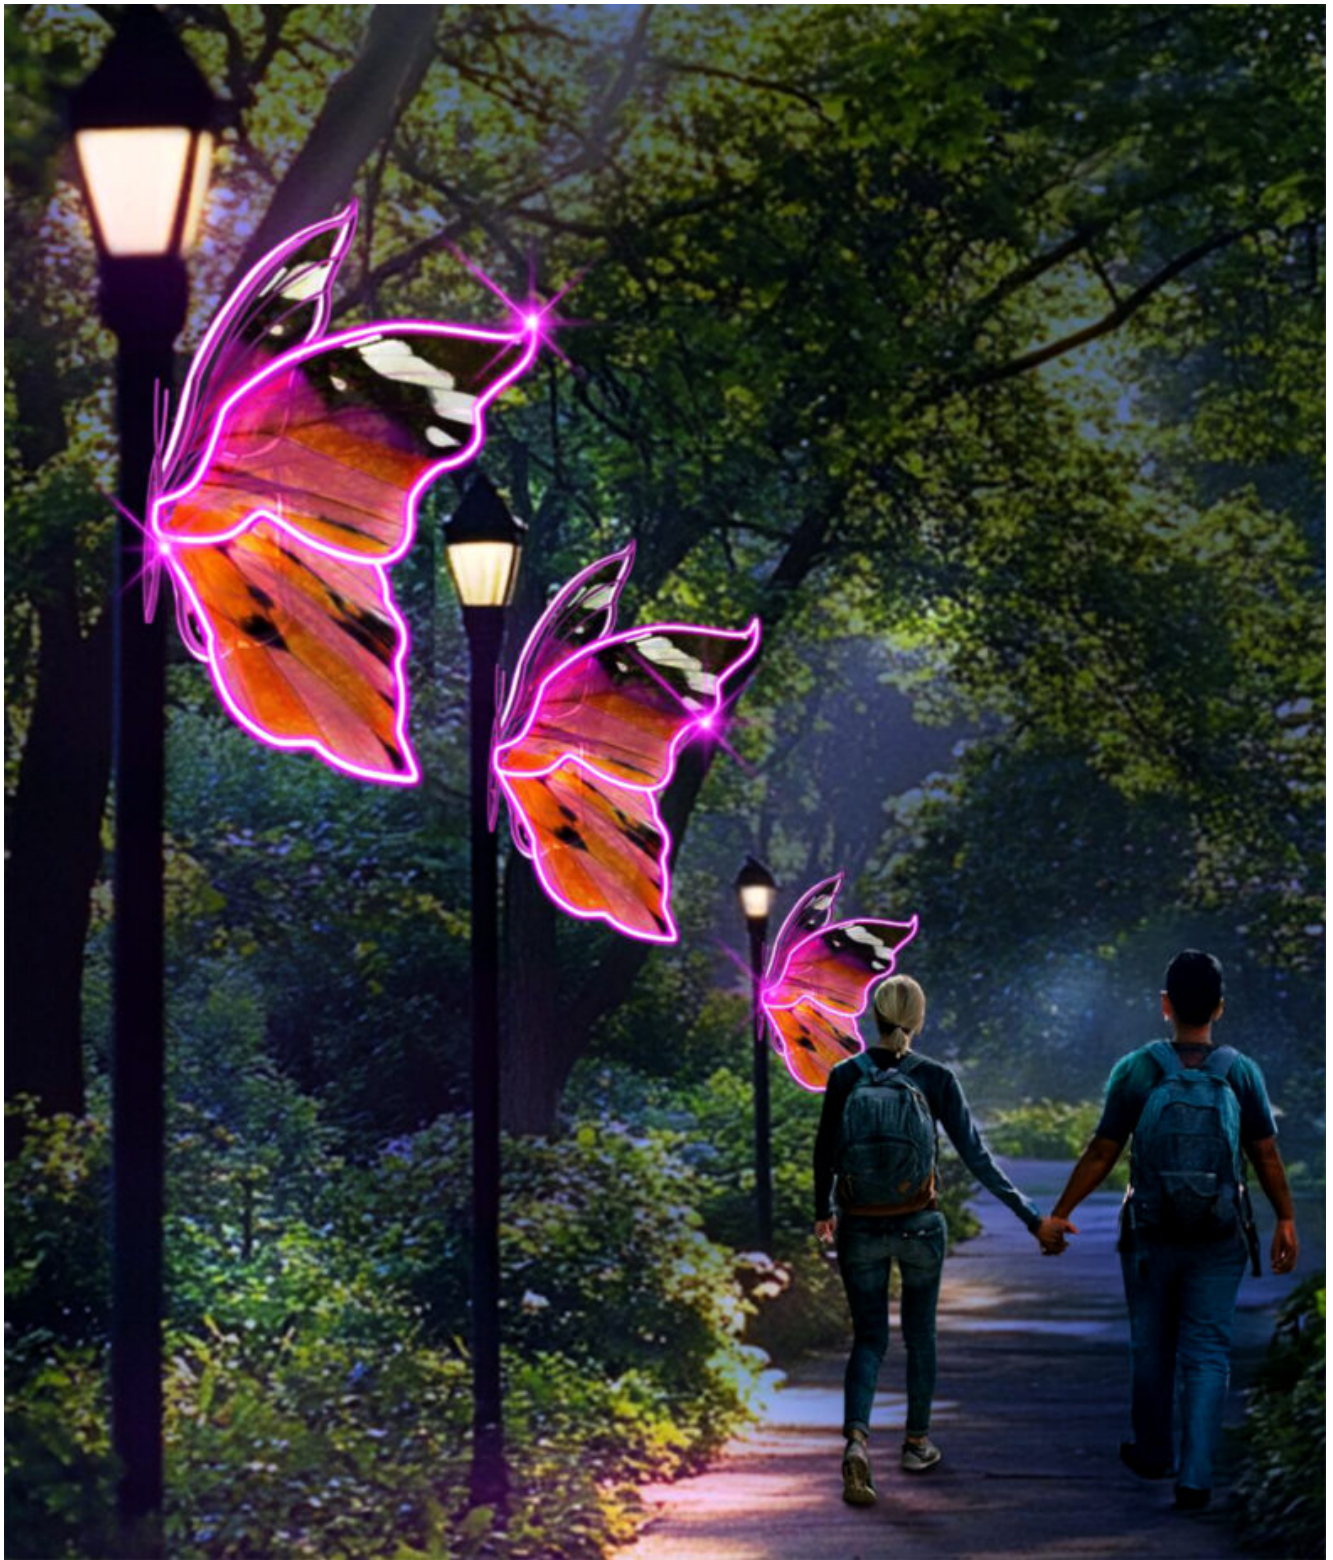

#TWOJEMIASTO

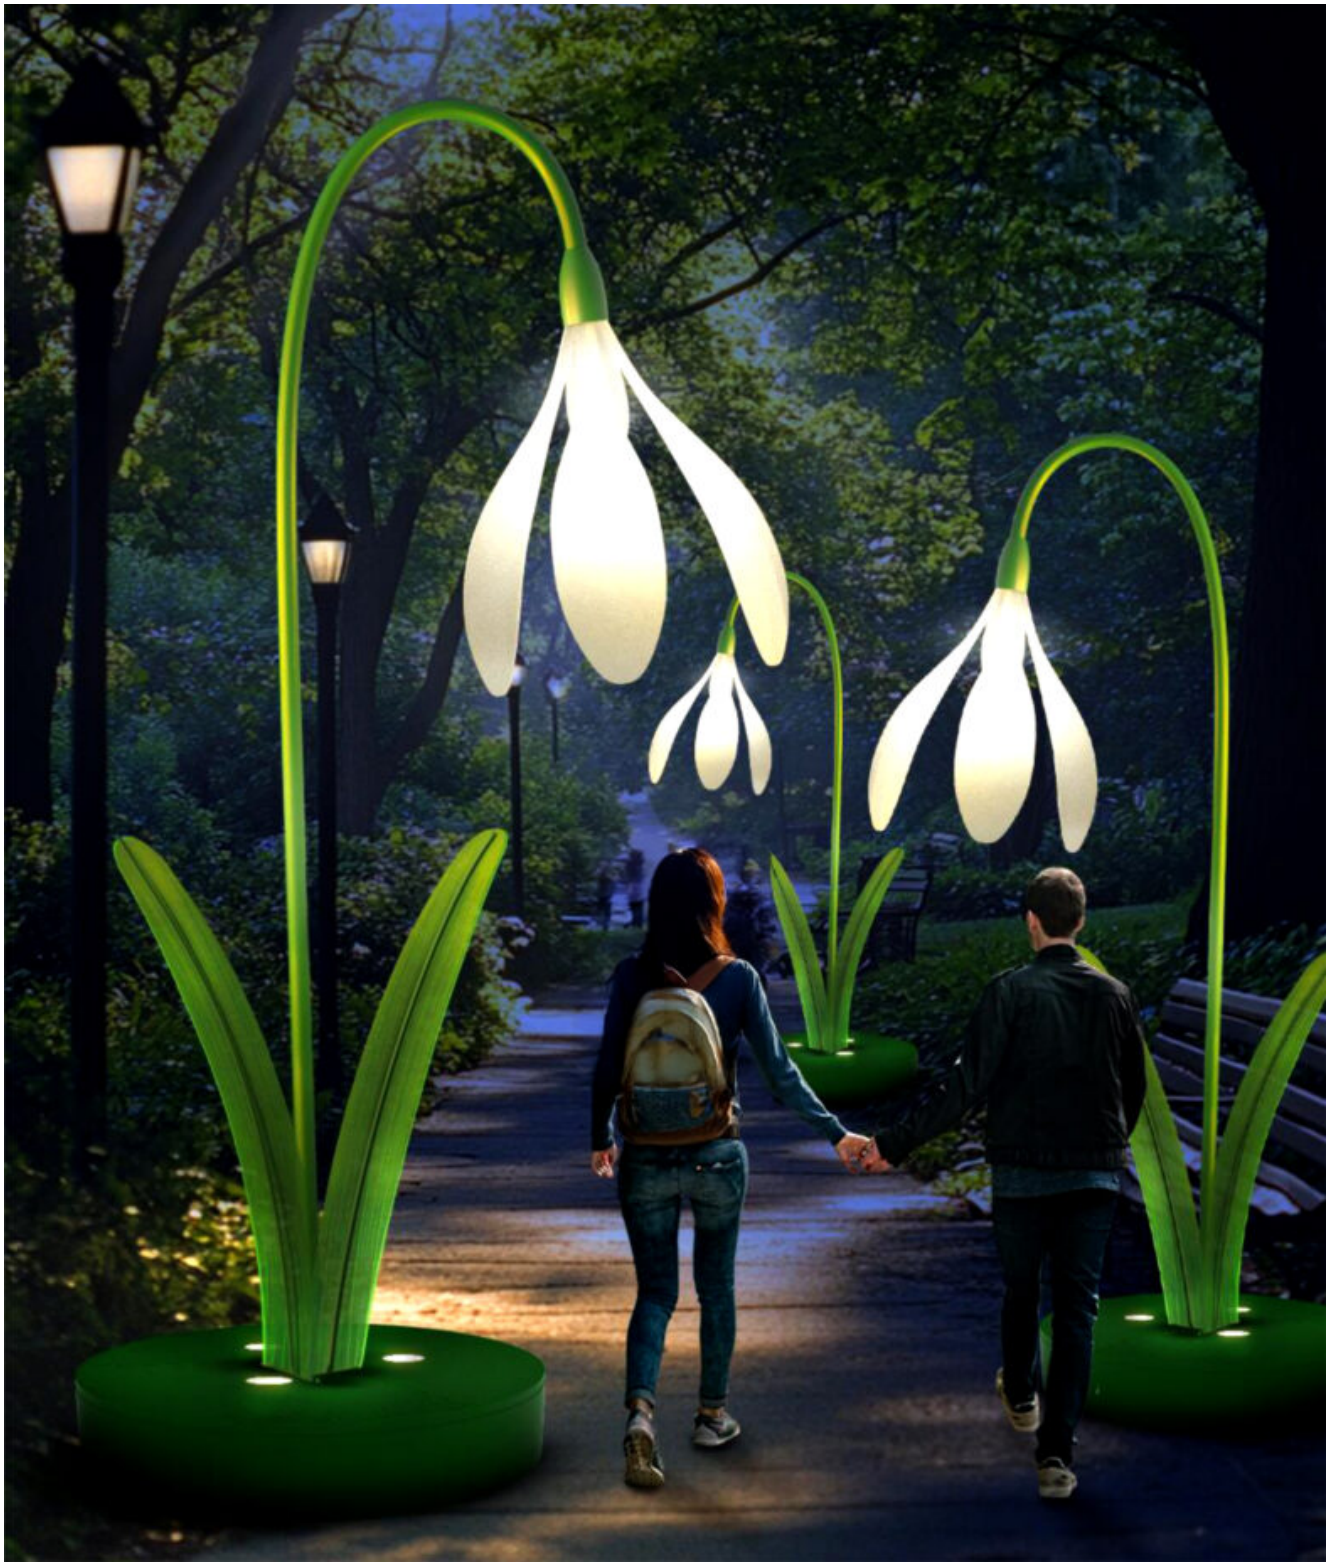

The new collection also features large-scale themed light installations, perfect as focal points in parks, public squares, or during summer events. All elements of the collection can be freely combined to create cohesive and striking light-and-flower compositions. Below, we present a gallery of our latest designs—ready to light up your city!

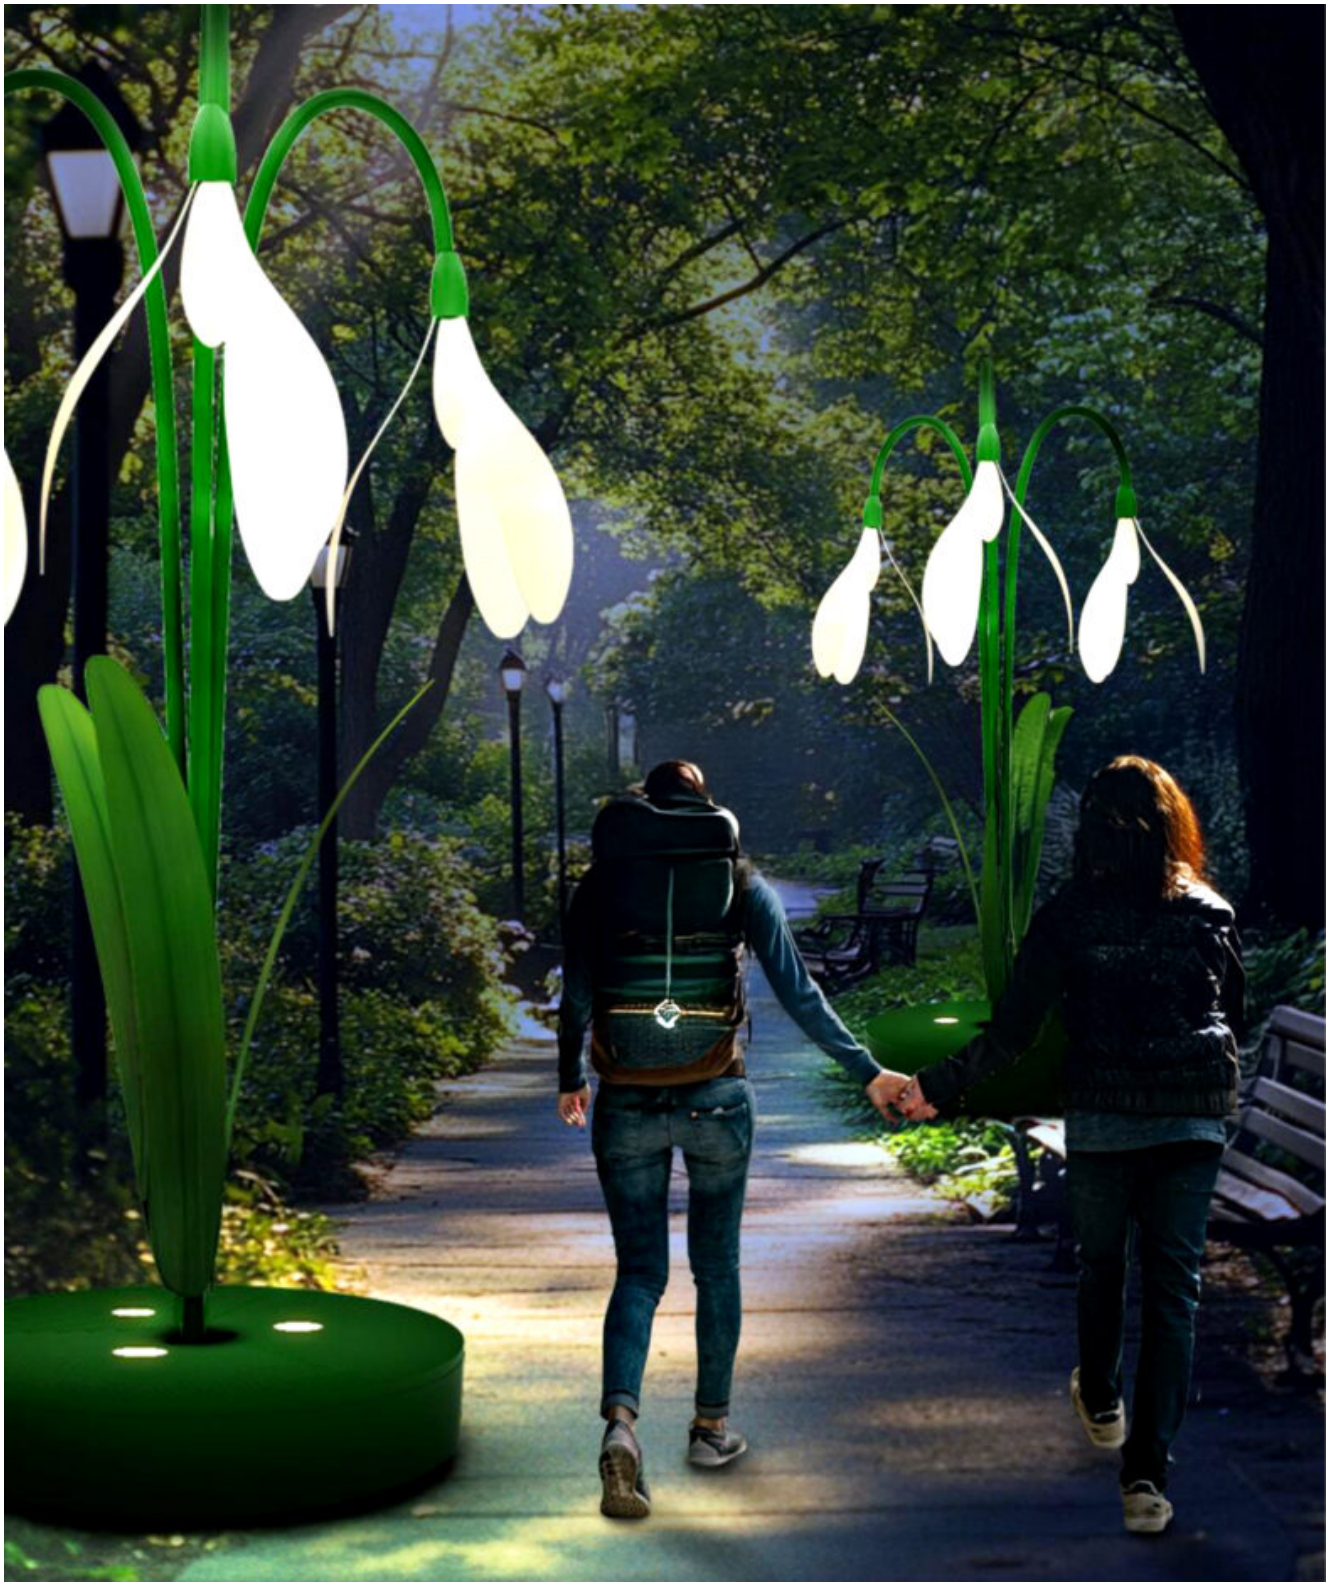

Well-chosen illuminations can completely transform urban space – they capture attention, create ambiance, and invite people to enjoy the outdoors even after sunset. Because summer in the city is no longer just about sunshine during the day – it’s also about the light that brightens the streets at night.
