

Luckenwalde – just wonderful Christmas!

There were a lot of Christmas decorations around. One could admire unusual ornaments and atmospheric light strings. In the German city of Luckenwalde, exceptionally unique elements appeared: intensely red XXL baubles and slender openwork decorations.

The Christmas composition was set on one of the city's roundabouts, which is passed by the inhabitants of the nearby neighborhood every day. It is an important place worth emphasising – especially in the run-up to Christmas.

For this reason the character of it was pretty changed – the roundabout space was filled with slender openwork decorations in the shape of cones. These elements inspired by the traditional Christmas tree were illuminated with strings of delicate lights, therefore, the composition is most delightful in the evenings. The illumination of the roundabout is another benefit and a way to disperse the early winter dusk. Moreover, the crossroads became more visible and so safer.
